Text

After publication of this work [1], we found that we inadvertently failed to include the complete title of the affiliation. The full description of affiliation has now been added and the Authors' contributions and Competing interests section modified accordingly.

Competing interests

The authors declare that they have no competing interests.

Authors' contributions

XXF and LSY conceived the study, performed most experiment and drafted the manuscript. HY participated in collecting the specimens. LZY and ZLH participated in the clinical data collection. WXZ participated in the manuscript writing and revision. DH carried out cellular studies. ML constructed the expression vector. JYN carried out a part of cellular studies. SCC and JJF conceived the study, participated in its design and gave final approval of the version to be published. All authors read and approved the final manuscript.

Author details

¹Department of gastrointestinal translational research, Peking University, Peking, China. ²Department of Biochemistry and Molecular Biology, Peking, China. ³Tissue bank, Key laboratory of Carcinogenesis and Translational Research (Ministry of Education) Peking University Cancer Hospital & Institute, Beijing, China. ⁴Department of gastrointestinal surgery, Key laboratory of Carcinogenesis and Translational Research (Ministry of Education) Peking University Cancer Hospital & Institute, Beijing, China.
