After publication of this article [1] it was brought to our attention that there were errors in Figs. 4a, b, 5a, 6a and 7a. We found that the GAPDH control bands were mistakenly placed. There were also some errors in the description of cell treatment in the legend of Fig. 4.

The corrected figures and figure legend are shown below. These corrections do not change the results or conclusions of the article. We apologise to readers for these errors.
